## PRIVACY FACT SHEET: AVAYA WORKPLACE

### Some Privacy Facts about Avaya Workplace:

- Avaya Workplace is a software client. This means, the details of data processing depend on the underlying core solutions that drive the used services. Please reach out to the administrator of your core system to find out more about the concrete data processing.
- Avaya Workplace only processes personal data it needs to provide you with certain functionalities.
- Besides the data processing in the core solutions, Avaya Workplace itself does not share any data with Avaya or other third parties, except for aggregated and anonymized technical data for the sole purpose of quality improvement of Workplace.
- There is only a limited amount of personal data stored within Workplace itself on your local device. The application enables you to access your data from the designated network each time you start Avaya Workplace.
- Workplace includes pre-meeting and in-meeting features to empower you to make decisions regarding your and your guests' personal data being processed within the Avaya Workplace application.

Avaya Workplace is a client/end-point application for Avaya communication solutions that enables you to access many features from a wide range of Avaya communications and collaboration systems from a single application. It can be used in conjunction with your Avaya desk phone or enable you to work remotely without compromise by using your supported mobile device. Depending on the capabilities of the connected core-solution, it provides you inter alia with key telephony features of Avaya Aura and IP Office telecommunication systems, voice and video, rich conferencing, instant messaging, presence, corporate directory access, desktop integration and remote worker support.

The processing of personal data by the underlying solutions may vary and is not covered in this privacy fact sheet. For more information regarding the underlying Avaya solutions, please reach out to the administrator of the core systems or services you're accessing with Avaya Workplace.

In the context of this document, “host” means someone who can host meetings; “you” or “user” or “participant” means the individual using Avaya Workplace ; “member” means an individual who has been invited into the meeting and has been given certain data access privileges by the host.

## 1. What types of personal data might be processed by Avaya Workplace and for what purposes?

Avaya Workplace only processes personal data necessary to provide you with its functionalities. Below is a list of the personal data categories (along with specific data usage purposes) that, depending on the concrete use case, may be processed by Avaya Workplace.

## 2. Avaya does not access your content within Avaya Workplace

Avaya Workplace data (including recordings, instant messages, call history, your contacts) belong to you and the organization responsible for the underlying solutions. Avaya does not access your content data on Avaya Workplace, unless Avaya is instructed (by your organization) to provide technical support.

Avaya may collect via Avaya Workplace aggregated and anonymized technical data (i.e., data that does not directly identify a human being) regarding how the use of Avaya Workplace, such as how frequently Avaya Workplace is utilized, how many calls/conferences are made, how many instant messages were sent/received, etc. for the sole purpose of improving Avaya Workplace. Administrators can disable such collection for its users on a corporate account level, or you can deactivate this feature yourself in the settings of Avaya Workplace.

## 3. Privacy features within Avaya Workplace

Avaya Workplace has a variety of features (“privacy by design and default” features), which will empower you to make decisions regarding the use of your personal data. Depending on the Avaya Workplace configuration set by your organization (i.e., our Customer), some features or settings may not be visible to you.

### ▪ Authentication

Avaya Workplace supports several authentication methods (e.g., Username/Password, Unified Login, Avaya Authorization, Avaya Cloud Authorization, Microsoft Modern Auth, Integrated Windows Authentication) to secure your data and assert your identity. Avaya Workplace will securely store your passwords in the platform security manager of your selected device or workstation. For additional security, you may choose to enter your passwords each time you launch Avaya Workplace.

### ▪ Call history

Call history records may be deleted at any time from the history pane of the Avaya Workplace application.

### ▪ Contacts and favorites

You may choose to allow Avaya Workplace to load only your corporate contacts or (in addition) your other contacts available on the device where Avaya Workplace is installed. Also, you may choose to select the contacts to appear in the list of “favorites”.

### ▪ Desktop / Application / Whiteboard sharing

In presentation mode, you may choose what to share with participants: entire screen, portion of the screen, applications, and/or whiteboard.

### ▪ Set timing for the meeting

The host may set the timing for the meeting which will result in a notification being played to the participants before the meeting ends (unless the host takes an action to extend the meeting).

### ▪ Controlling meeting participants

The host may:

- Audio mute/unmute the audio feed of any participant
- Block/unblock the video feed on any participant
- Remove a participant from the meeting
- Lock the meeting to prevent the admission of unauthorized (or late) participants
- Provide a one-time PIN for the meeting

- **Meeting recordings**

Avaya Workplace enables hosts to create audio and video recordings of meetings. Avaya Workplace will alert all participants via both audio and video that the meeting is being recorded. The designated participant, members and/or other parties (to be chosen by the host) may access/download the recorded meeting to his/her local storage device or keep it on the conference server. Recording permissions can be managed from the web-based meeting portal, accessible from Avaya Workplace.

- **Conference chat**

Avaya Workplace allows you to archive conference chat to a local file.

- **Camera and microphone**

Avaya Workplace allows you to automatically block your camera and microphone each time you enter the meeting.

- **Controlling who may see your presence**

Avaya Workplace allows you to manage your presence watchers (who you allow to observe your presence).

- **Instant messaging conversation**

Messaging participants may:

- Remove a participant from a conversation
- Leave the conversation
- Archive conversation contents to local files

- **Deleting your Avaya Workplace data within the application**

Avaya Workplace offers a “reset application” option, which will remove your Avaya Workplace data (i.e., logs, local settings, account credentials) from your device or workstation. After resetting the Avaya Workplace application, Avaya Workplace must be reconfigured before it can be used. This will not affect your other Avaya Workplace data (e.g., recordings, contacts, call history, etc.) being stored on the network.

- **Calendar data**

Avaya Workplace allows you to choose what calendar(s) to load (in a read-only mode) into the application to enable through one-click to join meetings.

- **Voice mail**

Avaya Workplace offers voicemail box message waiting indicator and one-click dial to access your voicemail box.

## 4. How long is your content kept within Avaya Workplace?

The administrator of the underlying solutions can determine the retention period for all content (e.g., files, direct messages, recordings, etc.) stored within Avaya Workplace on your device. Apart from that, you have various data retention controls within your Avaya Workplace:

- Call history items may be deleted by you from within Avaya Workplace at any time
- Contact data may be deleted by you from within Avaya Workplace at any time
- Calendar data is downloaded from your calendar provider at runtime. If you delete any calendar items in your calendar application, they will be removed from Avaya Workplace.
- Instant messaging data is downloaded from the messaging service at a runtime. Your organization may opt-in to allow you to archive your messaging conversation to a file.
- Conference chat may be archived locally while the conference is active. Conference chat is not available after the conference has ended.
- Diagnostic logging maintains up to approximately 100 MB of space (data to be stored on your device) and such logging data rolls over based on usage. You may minimize the diagnostic logging frequency within Avaya Workplace settings, however, in the event you choose to report a technical issue you are experiencing within Avaya Workplace to your organization, a limited number of logs might not provide the required technical details to fix an issue.

## About Avaya

Businesses are built by the experiences they provide, and every day, millions of those experiences are delivered by Avaya. Organizations trust Avaya to provide innovative solutions for some of their most important ambitions and challenges, giving them the freedom to engage their customers and employees in ways that deliver the greatest business benefits.

Avaya contact center and communications solutions power immersive, personalized, and unforgettable customer experiences that drive business momentum. With the freedom to choose their journey, there's no limit to the experiences Avaya customers can create.
